

FOR IMMEDIATE RELEASE: MARCH 16, 2018

***wtfast* Announces Partnership with AllServe & LoadCentral to Optimize Connections for Gamers in the Philippines**

**Kelowna, BC, Canada** - *wtfast*, the SaaS application that eliminates lag by optimizing game traffic through the world's largest gamers private network, announced today a partnership with both LoadCentral and AllServe. Together these two companies have a unique distribution model that will give Filipino gamers easier access to the *wtfast* Gamers Private Network.

LoadCentral and Allserve's widespread distribution network, gives prepaid and subscription based products top shelf placement at thousands of retailer locations all around the Philippines. LoadCentral will make *wtfast* subscription available for sale at Internet Café Chains; namely, Mineski and TNC; Pawnshops like Cebuana Lhuillier, M Lhuillier and Palawan Pawnshop; Remittance Centers like USSC (Western Union), Computer Stores, and Touch Pay stand-alone payment terminals. While Allserve is readily available in all 7Eleven, and selected Ministop convenience store outlets, plus in hundreds of individual I-Cafes nationwide. Gamers throughout the Philippines will now have easier access to subscription to the *wtfast* game network optimization tool.

Founded in 2009 and active in more than 100 countries, *wtfast* is designed exclusively for gamers and provides a more direct connection to servers for the most latency-sensitive applications: massive multiplayer online games (MMOGs). With four patents granted and partners including HiNet, a subsidiary of Chunghwa Telecom in Taiwan, Linksys and Gigabyte, *wtfast* protects against packet loss and improves ping times, saving seconds; which can mean the difference between winning and losing in the gaming world.

With a population of over 31 million online gamers, the Philippines is the 29<sup>th</sup> largest online game market in the world in terms of game revenue. These gamers will now have the advantage of improving his/her overall gaming experience by subscribing to the *wtfast* Gamers Private Network.

*wtfast* premium game network optimization tool offers support to over 1000 game titles worldwide. Gamers who leverage the *wtfast* technology will experience lower ping rates, less jitter and latency and lower packet loss. They also have the option to play on any game server in the world.

"We are honoured to be working with the teams at both LoadCentral and AllServe. Helping gamers have a better game play experience is something that we strive for at *wtfast* and are committed to delivering," said Rob Bartlett, CEO of *wtfast*. "With the *wtfast* game optimization service, we give gamers the competitive edge, with upwards of a 60% overall network improvement. This gives gamers a much smoother connection and reduced ping time to their favourite game servers, which can mean the difference between winning and losing their game!"

**About *wtfast*:**

*wtfast* is the Gamers Private Network (GPN) – a global network built exclusively for the transmission and delivery of online game data. Launched in 2010, the *wtfast* GPN is designed for the global online gaming and esports market, which is projected to reach \$108.9 billion USD in revenue by the end of 2017. With partners including ASUS, MSI, and Gigabyte, and advisors including Nolan Bushnell (Atari), Emil Mouhanna (Akamai), Jens Hilgers (ESL/BITKRAFT), and Dima Polyak (Riot Games, Super League Gaming), *wtfast* is committed to providing the best connection for gamers worldwide.
